The old kingdom is in danger. Enemy armies are attacking from all directions thanks to the Dark Lord, who seeks to bring eternal darkness across the land.

The only chance the players have is to band together and collect the fabled power stones in order to complete the magical amulet. If the odds are in their favour and they succeed, they'll save the empire. However, should even one area fall under the control of the Dark Lord, the old kingdom will be lost forever.

Roll for Adventure is a fast-paced dice-rolling game where players must react to the different threats they face. Using their dice, players will defeat monsters, collect crystals, and finally forge the amulet to win the game. However, players must be careful not to over-extend themselves or risk running out of dice to complete their mission. Roll for Adventure features variable difficulty levels to keep the game quick and challenging for any party of adventurers!
